

The Global Health Delivery Intensive

July 6 – 24, 2020

Harvard University

Boston, MA

Program Description

The Global Health Delivery Intensive (GHDI) is a rigorous non-degree summer program that trains public health leaders and health practitioners.

The program is co-sponsored by the Harvard T.H. Chan School of Public Health and Harvard Medical School, under the direction of Harvard faculty on the staff of Brigham and Women's Hospital.

Applicants should have a demonstrated commitment to global health and experience in global health organizations, with a substantial background in health care or a related field. International candidates are encouraged to apply.

2019 GHDI CLASS

Course Offerings

Introduction to Global Health Care Delivery

Engages students in the analysis of **case studies** that describe efforts to improve health care delivery in resource-poor settings, and illuminates principles and frameworks for the design of efficient and effective global health interventions. (2.5 credits)

Epidemiologic Methods for Global Health

Covers introductory level epidemiology and biostatistics using global health-related problem sets. (2.5 credits)

Management Practices in Health Care Delivery

Educates students in the fundamental principles of organizational behavior, strategy, operations management, leadership and financial accounting relevant for work in leading global health programs. (1.25 credits)

The Global Health Delivery Project at Harvard University
